

Demonstration of Tests of Conversion of PM Dot Notation to Parentheses

Dennis J. Darland

October 30, 2025

SECTION 0. VERIFICATION TESTS (of dot to paren dot icn)

For each proposition is given:

- 1: the PM notation with dots.
 - 2: the notation with parentheses
 - 3: the Polish (with Lukasiewicz symbols) notation
-

*2•06†: $p \supset q. \supset q \supset r. \supset p \supset r$
*3•47†: $p \supset r. q \supset s. \supset p. q. \supset r. s$
*4•22†: $p \equiv q. q \equiv r. \supset p \equiv r$
*4•41†: $p. \vee q. r. \equiv p \vee q. p \vee r$
*4•43†: $p. \equiv p \vee q. p \vee \sim q$
*4•44†: $p. \equiv p. \vee p. q$
*4•87†: $p. q. \supset r. \equiv p. \supset q \supset r. \equiv q. \supset p \supset r. \equiv q. p. \supset r$
*4•88†: $p. q. \supset r. \equiv p. \supset q \supset r. \equiv q. \supset p \supset r. \equiv q. p. \supset r$
*5•33†: $p. q \supset r. \equiv p. p. q. \supset r$
*431•441†: $p \vee q. \equiv r \supset s$
*431•442†: $p. \vee q \equiv r. \supset s$
*431•443†: $p \vee q. \equiv r. \supset s$
*431•444†: $p. \vee q \equiv r. \supset s$
*431•445†: $p. \vee q. \equiv r \supset s$
*431•54†: $p. q. r. s. \supset p. s. r. q$
