Demonstration of Tests of Conversion of PM Dot Notation to Parentheses

Dennis J. Darland

November 11, 2026

SECTION 0. VERIFICATION TESTS (of dot to paren dot icn)
For each proposition is given:
1: the PM notation with dots.
2: the notation with parentheses
3: the Polish (with Lukasiewicz symbols) notation
4: the Polish notation from Dan O'Leary's translation for comparison

---

According to PM to *56, page 9. "The scope of the bracket indicated by any collection of dots extends backwards or forwards beyond any smaller number of dots, or any equal number from a group of less force, until we reach either the end of the asserted proposition or a greater number of dots or an equal number belonging to a group of equal or superior force."
